Anglais
Proficient - C1

Work Experience

Gameplay Programmer, *FromTheFrench*
01/2025 – 08/2026 | Paris, France
Multiplayer mobile trading card game (TCG), Unity, C#, iOS / Android:

- Back-end: Designed the project architecture (MVP), implemented game logic and network logic.
- Front-end: Integrated UI and SFX assets, developed interfaces, and designed player interactions.

Gameplay Programmer, *UNDEAD Battery*
02/2024 – 08/2024 | France
Worked onTRYP FPV, a drone simulation on Unreal Engine (C++ / Blueprints). Programmed a replay system for the race mode. Integrated the Steam API to share the player profile, replay, and score of a race. Developed UI/UX, such as the leaderboard and the profile.

Education

Expert in 3D Software Platform Programming,
ISART Digital
09/2021 – 08/2026 | Paris, France

Projects

Hybrid simulation of crowd movements using AI: Multi-Agent Model and Fluid Dynamics,
Final-Year Research Project - ISART Digital
09/2025 – 06/2026
Designed a crowd simulation in Unreal Engine 5 (C++). Implemented agent behavior (navigation, MassAI) and the associated physics (SPH). Managed the project (state-of-the-art review, planning) and wrote a thesis.

Coastal Drift, *Multidisciplinary Project - ISART Digital*
09/2024 – 07/2024
Developed an action-shooter video game in Unreal Engine (C++/Blueprints) with a team of twenty people from different disciplines. Designed and implemented multiple AIs (Behaviour Trees), coordinated a team, and tracked tasks.
